

Gas Distribution Products

Natural Gas Measurement and Regulation

Diaphragm Gas Meters ■ Electronic "Smart" Gas Meters ■
Rotary Meters ■ Gas Regulators

Natural Gas Regulation

Automated Meter Reading Solutions Drive-by ■ Cellular Solutions

Anodeless Gas Risers ■ Transition Fittings ■, Meter Manifolds Meter
and Riser Brackets ■ Industrial Spools and Meter Set Assemblies

Excess Flow Valves

Electrofusion Equipment and Fittings

Gas Tapping Equipment, Line Stopper Fittings and Meter Valves

Polyethylene Gas Pipe and Fittings

Polyethylene Gas Valves

Butt and Socket Fusion Equipment, Pipe Scrapers

Squeeze Off Tools

Tracer Wire Connectors

Leak Detection Soap

Meter Security Devices

Flexible Utility Markers, Cathodic Protection Stations

Marking and Construction Enamel Paints

Tracer Wire (PE Coated) and Connectors

Pipe Clamps ■ Mechanical Fittings ■ Pipeline Strainers ■ Pressure Gauges ■ Marking
Flags ■ Stake Chasers ■ Pipeline Pigging Products ■ Weld Fittings and Flanges ■
Protective Coating Tapes ■ Thread Sealants ■ Weld Fittings ■ Plug Valves ■ Swage
Nipples ■ Valve Boxes ■ Flange Gaskets ■ Flexible Gas Connectors for Appliance and
Mobile Homes

LPG Regulation

Honeywell

THE POWER OF CONNECTED

Honeywell

AMERICAN METER C

Mueller Co.
GAS PRODUCTS DIVISION

MUELLER IS THE MOST TRUSTED SUPPLIER OF RELIABLE AND SAFE FLOW CONTROL SYSTEMS FOR NATURAL GAS DISTRIBUTION LINES IN NORTH AMERICA.

HONEYWELL CONNECTED UTILITY

AC-250NXS

AC-250NXU

The **Next-Generation Cellular Module (NXCM)** is a direct-fit replacement for standard form factor AMR and AMI, both front and top mount applications. Boasting a 20-year battery life, advanced tamper detection, and multi-port linking for peripheral devices (valves, leak detection, etc.), the NXCM offers the flexibility you need to upgrade your gas distribution system for the future.

The **American Meter AC-250NXS** brings cutting-edge functionality to a tried and true diaphragm meter platform. With a gas-tight, integrated shutoff valve linked to onboard pressure and temperature sensors, the AC-250NXS enables an almost instant, autonomous shutoff response to system anomalies such as over-pressure, high-flow, leakage, or fire. Also included is a replaceable 20-year battery and completely configurable communication.

The **American Meter AC-250NXU** offers the same great feature set as our smart diaphragm platform (NXS), but is built upon the most advanced ultrasonic technology available. Our proprietary design ensures accurate measurement of *all* gas compositions with the added benefit of **predictive maintenance diagnostics**.
